YOMI OKUNGBURE

Business Intelligence & Performance Analyst | KPI Benchmarking · Forecasting & Modeling · Power BI · SQL

Regina, SK | 416 418 4970 | b.okungbure@gmail.com | https://www.linkedin.com/in/yomi-okungbure/

PROFESSIONAL SUMMARY

Regina-based Business Intelligence and Data Analyst with 5+ years of experience researching, modeling and reporting business performance metrics for management decision-making. Builds KPI dashboards, forecasting analyses and SQL data models in Power BI that surface trends, anomalies and improvement opportunities, and translates findings into clear recommendations for leadership. Experienced training and coaching users, presenting to management and cross-functional teams, and streamlining reporting processes across sales, finance and operations.

CORE COMPETENCIES

KPI Development & Benchmarking | Forecasting & Predictive Modeling | Trend & Anomaly Analysis | Business Performance Reporting | Business Intelligence Requirements & Design | Database Concepts & Data Modeling | Statistical Analysis | Sales & Customer Performance Analytics | Process Improvement | Data Quality & Governance | Executive Presentations | Stakeholder Influence | Training & Coaching | Multiple Priorities & Deadlines

TECH STACK

SQL, Microsoft SQL Server, Azure SQL, Power BI, DAX, Power Query, Tableau, Looker, Python, Jupyter Notebook, Matplotlib, Microsoft Excel (Advanced), VBA, Access, SAP FI/CO, ERP Systems, AWS, dbt (In Progress), Jira, Google Sheets/Drive

WORK EXPERIENCE

LastCall Analytics| Data Analyst

2024 – Present | Regina, SK

- Develop and maintain Power BI dashboards and reports providing a centralized view of sales KPIs, customer performance and business trends for supplier and distributor stakeholders in the alcohol and beverage industry.
- Analyze sales and customer data to identify trends, anomalies and performance gaps, translating findings into clear business recommendations for client decision-makers.
- Conduct data profiling and validation to ensure accuracy and consistency of reporting metrics across client environments.
- Lead client training and working sessions, coaching users to adopt the analytics platform and interpret performance metrics.
- Identify reporting gaps and partner with internal teams in an Agile environment to implement streamlined reporting improvements; use AI tools (Claude, ChatGPT) to accelerate analysis and documentation.

Electronic Arts | Data Analyst

September 2022 – 2024 | Remote

- Built a Power BI usage tracking dashboard using a Python API script and DAX measures to monitor stakeholder engagement, reducing monthly support request volume by 30%.
- Gathered business requirements and designed a SQL star schema data model and Power BI reporting solution for project management metrics, improving project completion rates from 40% to 60%.
- Developed a risk-based testing report with DAX formulas across the full delivery lifecycle (requirements, prototyping, QA, production release, post-launch support), reducing testing time by 17%.
- Presented insights and led training sessions for engineering and business teams; documented data models and reporting standards for all deployed tools.

Cosmetica Labs Inc | Financial & Business Systems Analyst
January 2022 – September 2022

- Designed a live data quality tracking report that improved master data accuracy from 76% to 98%, supporting reliable financial forecasting and planning.
- Optimized SQL queries and ETL processes, reducing data ingestion runtime by 12%.
- Created dashboards on business trends and KPIs for multiple departments using Power BI, SSRS, Access and Excel, and developed data flow diagrams of business processes.
- Standardized documentation and reporting templates across the analytics team, improving analytic turnaround time by 20%.

Samsung Electronics | Financial Reporting Analyst
May 2019 – January 2022

- Improved financial forecasting accuracy by 15% by analyzing historical financial data trends and collaborating with the supply chain team.
- Designed real-time dashboards tracking warehouse costs, P&L and profit margins, providing senior management with timely business metrics for decision-making.
- Reduced inventory costs by 12% through detailed financial analysis and a structured stock-level planning process.
- Managed data integrity and reconciliation across SAP FI/CO and ERP systems during monthly close cycles.
